PROFESSIONAL SUMMARY

Results-driven IT Supervisor and Network & Security Engineer with 5+ years of experience designing, securing, and managing enterprise network infrastructures across multi-site environments. Strong expertise in firewall administration (Palo Alto & FortiGate), network segmentation, VPN technologies, Windows Server, and cloud platforms (Oracle OCI). Proven ability to lead IT operations, enhance security posture, optimize performance, and deliver business-critical infrastructure projects.

CORE COMPETENCIES

Networking: Cisco, MikroTik, Ubiquiti, Extreme, Huawei, LAN/WAN/VLAN, Wireless Networks, Fiber Optic Infrastructure, SD-WAN

Network Security: Palo Alto Firewalls, FortiGate (Policy Management, NAT, IPSec VPN, SSL VPN), Forescout NAC, Cisco Umbrella, Network Segmentation, Traffic Shaping, Security Hardening

Systems Administration: Windows Server (AD DS, DNS, DHCP, GPO), Linux Server Administration

Cloud & Enterprise Systems: Oracle Cloud Infrastructure (OCI), Google Workspace, Microsoft 365, ERP Systems, Cloud & Local Hosting

Telephony & Infrastructure: Avaya IP Office, IP Telephony, Surveillance Systems, Data Centers

IT Operations: Technical Support, Asset Management, ITIL 4 Framework, Vendor Coordination, IT Documentation

PROFESSIONAL EXPERIENCE

Network & Security Engineer — RUA Al Madinah (Dar AlHijra) 2026 – Present

- Designed the full enterprise network for Building C3 (new headquarters): VLAN architecture, IP schema, 3-tier topology, and WAN design.
- Administered FortiGate firewalls (FortiGate 901G / FortiOS 7.2): policy analysis, SD-WAN load balancing, NAT, and formal change requests.
- Built and troubleshooted FortiGate-to-Oracle OCI IPSec VPN connectivity, including DDNS configuration for cloud reachability.
- Produced daily and weekly security reporting: traffic analysis, beaconing detection, NAC monitoring, and threat investigation.
- Integrated enterprise security solutions including Cisco Umbrella (DNS-layer security) and Forescout NAC.
- Delivered a Wi-Fi performance assessment across HQ buildings with executive reporting and remediation recommendations.
- Produced formal client-facing deliverables: network topology diagrams and technical documentation.

IT Supervisor — Madac International Schools 2024 – 2026

- Led and managed IT operations across multi-building infrastructure including 2 data centers and 8 control rooms.
- Oversaw enterprise systems (Google Workspace, Microsoft 365, ERP) ensuring availability, security, and performance.
- Managed IT budgets, procurement processes, and vendor coordination to optimize cost and efficiency.
- Supported HR in recruitment, interviews, and onboarding of IT personnel.
- Implemented IT policies, security standards, and infrastructure improvement initiatives.

Network & Security Engineer — Madac International Schools

2022 – 2024

- Designed, deployed, and maintained enterprise network infrastructure across multiple sites.
- Configured and managed Cisco, MikroTik, Extreme, Ubiquiti, Palo Alto, and FortiGate devices.
- Implemented Palo Alto and FortiGate firewall policies including NAT, IPSec VPN, SSL VPN, user access control, and traffic shaping.
- Applied network segmentation and security hardening best practices to enhance security posture.
- Led fiber optic cabling and infrastructure expansion projects.
- Configured Windows Server environments (Active Directory, DNS, DHCP, GPO) and administered Linux servers for enterprise services.
- Created and managed cloud and local hosting solutions (VPN, ERP systems, web servers, storage, asset inventory).
- Managed Avaya IP telephony systems and video surveillance platforms; provided Tier 2/3 technical support.

IT Support Specialist — Abdullah Al Hammad Hotels

2021 – 2022

- Supported hotel IT systems including PMS, Opera, and Oracle-based solutions.
- Configured and troubleshooted LAN/WAN/WLAN environments and firewall systems.
- Installed and maintained servers, switches, security cameras, and end-user devices.
- Performed system upgrades, optimization, and preventive maintenance.
- Delivered technical support and resolved customer technical issues.

EDUCATION

Bachelor of Engineering Technology — Computer Network System Support

2020

Technical and Vocational Training Corporation (TVTC)

Associate Degree — Computer Networks

2017

Community College, Taibah University
